

# Distributed Cache Design Interview Closing Checklist

Final 2–3 Minutes Strategy

---

Interview Closing Checklist: Distributed Cache System Design

---

## 1) Summary Components

- Recap key requirements (scale, latency, consistency)
- Highlight architectural choices (partitioning, replication, caching pattern)
- State major trade-offs made

## 2) Acknowledge Limitations

- Mention aspects simplified or not covered
- Note assumptions made during design

## 3) Demonstrate Flexibility

- Offer 1–2 variations for different use cases
- Show how design would change with different requirements

## 4) Invite Discussion

- Ask if interviewer wants deeper dive on any aspect

- Signal readiness for follow-up questions

*Footer note:* This structured closing demonstrates senior-level communication and systems thinking.
